

SAC-QUTAB | Contribution assignment

Agreed publication responsibilities

This table allocates the publication and final-verification work equally. It is not a verified retrospective account of individual research effort. The completed experiment predates this publication sequence. No unobserved individual contribution or human review is asserted.

Member	Code	Report sections	Experiments / verification	Slides	Other
Farah Feyzullayev @GeminusF	Package integration; PR/review templates	Reproduction entry points and release references	Training runbook and freeze/resume documentation	Review narrative consistency	PRs 1, 6, 11; reviews 5, 9, 13
Nicat Aghayev @Nicat-Agayev	Resource validation; provenance regression; contribution tools	Data, weights and provenance documentation	Verify saved-output provenance	Review experiment explanations	PRs 2, 7, 12; reviews 1, 10, 14
Sharaf Feyzullayev @optim00s	Environment profiles; report build; CI checks	Report source and canonical assets	Check runtime compatibility	Review model and setup material	PRs 3, 8, 13; reviews 2, 6, 15
Milana Karimova @milanakarimova	Evidence packaging; report audit	Claim/evidence mapping; final manuscript QA	Verify evidence hashes and release inputs	Review results and limitations	PRs 4, 9, 14; reviews 3, 7, 11
Jeyhuna Sevdieva @Jeyhunaa	Headline replay and release manifest	Contribution assignment and release checklist	Replay saved predictions and detector coefficients	Package supplied presentation PDF	PRs 5, 10, 15; reviews 4, 8, 12

Balance: 3 PRs, 6 substantive commits and 3 primary reviews per member. Bootstrap and merge commits are reported separately; necessary corrections may differ by one commit.

Observed activity: publication PR execution is recorded separately in the GitHub audit. The GitHub audit produces actual counts separately. Account-switching automation may submit checks and reviews; this does not establish independent human scientific assessment.

Agreement status: all five members agreed, as confirmed by the team representative in this publication session. Historical Code / Report / Experiments / Slides contributions can be recorded when the team supplies an agreed account.
